INO Press 2D2 500

High productive automatic transfer press

Automatic two-post press INO press 2D2 500 is designed for transferring labels onto various materials by heat and pressure. Two posts enable maximum use of time and maximize transferring performance.

Advantages and benefits of INO Press 2D2 500

- Uniform temperature over the heating plate.
- High pressure.
- You will not be burnt while replacing the print and the labels, and the heating plate will not radiate into your hands, because the heating plate moves to the other side.
- Quickly replaceable lower plates for different materials like T-shirts, umbrellas, bags, sleeves, backpacks.
- The possibility of selecting 9 programs with preset transfer parameters.
- Operator can choose between two programs: work with hot-peel or cool-peel transfers. In hot-peel mode, the heating plate moves automatically towards the second post. In cool-peel mode, the heating plate waits for operator to launch the next command.
- Automatic press allows pre-heating or drying of printed materials prior to printing by pressing pre-heating button. Pre-heating time is a special parameter.

Technical characteristics

Performance:	Up to 200 transfers per hour
Heating plate temperature:	Adjustable from 20 – 220 °C
Pressing time:	Adjustable from 0 to 99 seconds
Pre-heating time:	Adjustable from 0 to 99 seconds
Heating plate dimension:	400 x 500 mm
