INO Coater GFC

Frame roller coating machine

Device consists of:

- Solid basic frame.
- Transport system with transport belt and supporting roller.
- Application unit which consists of:
 - Doctor-blade roller.
 - Rubber made application roller.
 - Distance adjustment system unit between doctor-blade roller and rubber made application-roller, which determine ink deposit.
 - Motor driven vertical application unit drive.
- Rubber made application roller with 28 incisions per inch [cca 100 gr/m²].

Technical characteristics:

Additional supporting roller diameter	350 mm
Rubber made application roller diameter	350 mm
Rubber made application roller length	400 mm
Maximum printing edge width	300 mm
Rubber made application roller speed	adjustable between 1,5 and 9 m/min
Doctor-blade roller diameter	240 mm
Doctor-blade roller speed	adjustable between 0,2 and 1 m/min
